

# Three documents. Three answers.

“Which indexation applies in January?”

Forecast  
Pro-Pay, 14 Oct

**2.13%**

Final figure  
Agoria, 22 Dec

**2.21%**

Company agreement  
Van Dessel CAO + Teams

**February**

Her search finds all three. Nothing tells her which one to trust.

# Dead, connected, alive.

## Dead

Classic AI search

Blends chunks into one confident answer. A forecast looks as relevant as the final figure.

## Connected

Knowledge graph

Someone has to draw the map and keep it current. It goes stale the week after.

## Alive

Mitosis

Divides itself as it reads, and catches the contradiction before anyone asks.

# It reads first, so you don't have to search.

**85%** of routing is rules and vector math, no LLM call. Facts are extracted once, when a document arrives.

# Tested on 102 documents with planted traps.

Answer accuracy, 18 golden questions

**78%** vs 61%

Mitosis
